AMA update FAA regulations:

Congressional Awareness Campaign on FAA regulations gets attention

After more than 85,000 letters to Congress expressing concern regarding FAA's intent to regulate model aviation, our message has been heard in the nation's capital. Members of Congress have responded with dozens of letters of support and many congressional leaders have pledged to advocate for the hobby. As of this writing, Congress is considering measures to exempt model aviation from onerous and unnecessary restrictions. Although it is too early to tell how this will play out, we can certainly say that our Congressional Awareness campaign was highly successful in bringing these issues to the attention of our elected officials. As the awareness campaign draws to a close, we are suspending additional letter writing efforts; however, now is not the time to let our guard down. The aeromodeling community is urged to remain vigilant and regularly check www.modelaircraft.org/gov for updates and another call to action if needed. Click below to read more..

Airplane Contest Results

March's aircraft was an Extreme STOL De Havilland Otter Testbed, correctly identified by two club members. Congratulations to:

Wayne Heminghous!

Due to the lateness of this month's newsletter, there is no airplane contest this time. Please accept my apologies. Recent family illnesses and injuries have kept me from getting this month's newsletter out on time.
